So, what is compassion?

when we can see the world through another person's eyes.

She was elderly, she would have been entitled probably to have hospital transport

when we are feeling vulnerable

so boredom is a big factor.

what they can do about it

Compassion isn't just about talking to the patients

where they can feel at home.

when the staff themselves feel cared for

Time to allow the patients speak about what matters most to them

and most importantly time for the staff to listen

I think you have to show a genuine interest in the patient

without being judgemental

how they experience their care.

would empower patients to improve their quality of life
